

Albenel 100

100 mg/ml Albendazole

Oral suspension for cattle, sheep, goats, pigs, horses, poultry

COMPOSITION PER ML

Albendazole100 mg

Excipients (propylene glycol, polysorbate 80, carbomer, sodium hydroxide, methylparaben, propylparaben), filler (water).

Cream to grey suspension.

INDICATIONS FOR USE

For the treatment of worm infections in cattle, horses, sheep, goats, pigs and poultry:

Cattle, sheep, goats: fasciolosis, moniesiosis, strongilosis of the gastrointestinal tract (haemonchosis, trichostrongylosis, bunostomosis, nematodirus infection, chabertiosis, cooperiosis, etc.), strongyloidiasis, dictyocaulosis, protostrongylosis (mulleriosis, etc.).

Pigs: ascariasis, metastrongilosis, eosinophagostomiasis.

Horses: parascariosis, oxyuriasis, strongilosis of the gastrointestinal tract, strongyloidiasis.

Poultry: ascaridiosis, heterakidosis.

DOSAGE AND ADMINISTRATION

For oral administration via feed. For routine deworming only a single treatment is necessary. Shake well before use. No starvation or specific feeding regime is needed.

- Horses: 0,075 ml per kg body weight.

- Sheep, goats: Nematodirus infection, moniesiosis: 0,05 ml per kg body weight. Fasciolosis (mature forms): 0,075 ml per kg body weight.

- Cattle: Nematodirus infection, moniesiosis: 0,075 ml per kg body weight. Fasciolosis: 0,1 ml per kg body weight.

- Pigs: 0,05- 0,10 ml per kg body weight.

- Poultry: 0,05 ml per kg body weight.

By group administration, the calculated dose of Albenel 100 is mixed with a certain amount of concentrated feed required per animal:

Horses, cattle: 0,5-1,0 litre.

Sheep, goats: 150-200 ml.

Poultry: 50 ml.

The medicated feed should be poured into feeders for a group of animals (10-100 animals). Prior to mass treatment, test each lot of Albenel 100 on a small group of animals (5-10 animals, 50-100 birds). If adverse reactions are not observed within 3 days, the entire herd can be treated.

PHARMACOLOGICAL PROPERTIES

Albendazole is a broad-spectrum anthelmintic from the benzimidazole group effective against nematodes (*Bunostomum* spp., *Cooperia* spp., *Dictyocaulus* spp., *Haemonchus contortus*, *Nematodirus* spp., *Strongyloides* spp., *Trichostrongylus* spp., *Protostrongylus* spp., *Chabertia* spp., *Oesophagostomum* spp., *Parascaris aquorum*, *Ascaridia galli*, *Heterakis gallinae*, *Oxyuris equi*, *Metastrongylus* spp., etc.), cestodes and adult trematodes (*Fasciola* spp., *Moniezia* spp., etc.). The principal mode of action of albendazole is by its inhibitory effect on tubulin polymerization, which results in the loss of cytoplasmic microtubules and leads to the death and excretion of parasites. After oral administration, albendazole is partially absorbed from the gastrointestinal tract and distributed to the body's tissues. Albendazole is mainly excreted in urine, feces and bile unchanged, as well as metabolites.

CONTRAINDICATIONS

Do not use in cases of known hypersensitivity to the active substance. In such an event, antihistamine and symptomatic treatment should be undertaken as appropriate. Do not use in animals suffering from acute fasciolosis, during the mating period or the first third of pregnancy, in ill (infectious diseases) and weak animals.

ADVERSE REACTIONS

No undesirable effects are to be expected when the prescribed dosage regimen is followed.

DRUG INTERACTIONS

None known.

WITHDRAWAL PERIODS

Cattle, horses, sheep, goats, pigs: Meat: 20 days.

Poultry: Meat: 10 days.

Eggs, Milk: 4 days.

SPECIAL WARNINGS

Dispose of any unused product and empty containers in accordance with guidance from your local waste regulation authority.

USER WARNINGS

Wash hands after use. Avoid direct contact with the product. Wear suitable protective clothing including impermeable rubber gloves. In the event of accidental eye exposure, flush eye thoroughly with running water. In the event of accidental skin exposure, wash the affected area with soap and water. If irritation persists, seek medical attention.

STORAGE CONDITIONS AND SHELF LIFE

Store in the original package between 5°C to 25°C, protected from light and moisture.

Shelf life of the veterinary medicinal product as packaged for sale: 3 years.

Shelf life after first opening the container: 30 days.

Do not use this veterinary product after the expiry date which is stated on the label.

Keep out of the reach and sight of children.

MARKETING PACKAGING
